

LOSS Team

Local Outreach to Suicide Survivors

Offers support and resources to people in Tarrant County who have lost someone to suicide.

Why is outreach important?

More than 20 years of research shows survivors are at higher risk of suicide. On average, it takes survivors 4.5 years to seek grief counseling. With support from the LOSS Team, that average time is 39 days.

LOSS Team is a team comprised of volunteers who have been touched by suicide and mental health professionals.

If you know someone who would benefit from LOSS Team services or would like more information about the LOSS Team or training for your organization, please contact us.

LOSS Team: 682-263-LOSS or email LOSS@mhmrtc.org

WE CHANGE LIVES

Crisis Services

Goals

- Avoid an impending crisis due to identified stressors in the family.
- Provide short-term assistance to caregivers to minimize the need for a more restrictive service setting.
- Provide appropriate supervision and assistance in a non-stressful environment.
- Prevent unnecessary hospitalization and assist the individual in maintaining residence in the community.
- Normalized environment provides avenue for physical, psychological and social interventions targeted at the current crisis while fostering community reintegration.
